

Hyeong-Jin Park

hyeongjinn.park@gmail.com

INTERESTS	Security (with emphasis on CTI and dark web research), AI, Block Chain.	
EDUCATION	Arizona State University, USA	Jan 2021 – Dec 2023
	• Master of Computer Science • Graduated with Honors (Cum Laude equivalent)	
	Jeonbuk National University, Korea	Mar 2008 - Aug 2014
	• Bachelor of Computer Science and Engineering • Graduated with Outstanding Graduate Award (ranked 1st in project contest and algorithm contest)	
SKILLS	Programming & Scripting Languages	
	• Proficient in Python, C, C++, Java, Bash; familiar with Solidity, SQL, JavaScript	
	AI / Deep Learning	
	• Experience with PyTorch, TensorFlow, Keras, and Caffe • Built and fine-tuned models using Colab, Jupyter, and HuggingFace Transformers • Recent work includes LLM-based RAG (Retrieval-Augmented Generation) pipelines in Python using LangChain/Faiss and open-weight models (Gemma, Mistral)	
	Security & Reverse Engineering	
	• Android internals (Bootloader, Baseband, TEE, NDK, ART, LLVM) and malware analysis • Skilled in binary analysis using IDA, Ghidra, OllyDbg, Jadx, Apktool • Web security testing with Burp Suite, Fiddler; Fuzzing experience with AFL and honggfuzz • Experience with dark web threat intelligence tooling and OSINT practices • Static/dynamic analysis using Fortify, Androguard	
	Tools & Frameworks	
	• Familiar with Git, Docker, Linux CLI environments • Google Colab, VSCode, Jupyter, and HuggingFace Hub for development and experimentation	
CERTIFICATIONS	AWS Certified Security – Specialty	Jan 2024 - Jan 2027
INDUSTRY EXPERIENCE	Samsung Electronics, Suwon, South Korea	Jul 2014 - Present
	Security Team (Samsung Mobile), Suwon, South Korea	Jan 2016 - Present
	<i>Security Research Engineer</i>	
	Product Security Incident Response Team (PSIRT)	
	• Operates the official Samsung Mobile Security Rewards Program (https://security.samsungmobile.com/main.smsb). • Performs security risk assessment for Kernel, TEE, Application etc. in all Samsung Galaxy devices. • Oversees Cyber Threat Intelligence (CTI), including dark web monitoring and analysis of 0-day vulnerabilities, malware and ransomware threats.	
	Samsung Electronics Security Expert Research Group	
	• Share security issues of all Samsung Electronics products such as mobile, TV, and semi-conductors, and discover new security items.	
	Frontier Research Lab (Samsung Research), Suwon, South Korea	Jul 2014 - Dec 2015
	<i>Research Engineer</i>	
	• Implemented malware detection system on Android devices using deep learning. • Analyzed large dataset of Android applications to identify and statistically correlate key malware characteristics from dex file, native libraries, and (hidden) scripts or image files. • Research of AOT (Ahead Of Time compilation) compiler technique to convert the Android application to Tizen application.	

- Implementation of indoor autonomous mobile robot based on ROS (Robot Operating System).
- Implementation of drone algorithm to follow recorded face by using video-based machine learning.

Samsung Software Membership, Jeonju, South Korea

Jul 2012 - Jul 2014

Software Engineer

- Development and testing of image processing algorithm for gesture recognition (with Samsung Research)
- Implemented diverse projects using various technologies such as image processing, EEG signal analysis, and motor control.

RESEARCH
EXPERIENCE

Hyeong-Jin Park. 2018. Behavior-Based Automatic Malware Detection System using Deep Learning.
- In the 2018 Samsung Conference (for Samsung researchers only).

PATENTS

Malware detection system using static code analysis and probabilistic model - US16/068263 (2018.07.05)
Electronic Apparatus for detecting Malware and Method thereof - KR/10-2016-0072230 (2016.06.10)

EXTRACURRICULAR
ACTIVITIES

Sentinel Protocol Cyber Security Expert (<https://forum.sentinelprotocol.io/>)
RSK Ambassador at South Korea (<https://www.rsk.co/>)
